Computerized Sewing Machine

FEATURES AND BENEFITS

Onyx™ | 30

Embark on the Adventure of Sewing

Top Features

Over 150 Stitches

From basic utility and stretch stitches to decorative and quilting selections, this computerized machine's stitches provide a wide range of sewing techniques for endless creative possibilities.

Built-In Thread Cutter

One touch instantly cuts the top and bobbin threads and pulls the thread tails to the underside of your fabric.

Two Sewing Fonts

Personalize projects with custom words, phrases and monograms. Two font styles are included. Letters can also be combined with many decorative stitches for custom stitch sequences.

Needle Stop Up/Down

The needle can be programmed to stop in the highest position when you stop sewing, making it easier to remove the fabric from under the presser foot. It can also be programmed to stop in the down position, which is ideal for pivoting corners, sewing appliques, quilting, and more.

The mySewnet™ App*

Your personal sewing guide, right in your pocket! Explore machine tutorials, expert tips and step-by-step instructions tailored to your sewing needs. From learning your machine to troubleshooting common issues, the mySewnet App has you covered!

Sewing Guide Reference Chart

The convenient Sewing Guide Reference Chart provides information on how to select the best stitch, stitch length, stitch width, thread tension and presser foot for a variety of sewing techniques.

Speed Slider

Set your machine's maximum sewing speed as you like for full control – faster for long seams or slower for more detailed techniques.

Stitch Programming

Create custom stitch sequences to personalize and embellish your projects. Combine letters with many different decorative stitches, up to 40 characters.

Large LCD Screen

The large LCD screen displays your selected stitch, the stitch length and width settings, recommended presser foot and needle position. When winding the bobbin, the screen also indicates that the machine is in bobbin winding mode.

Visit mysewnet.com/studio for instructions to make these projects and more!

* Some features require a paid subscription.

Strong Piercing Power

Sew thick fabrics and quilt layers with confidence.

Semi-Automatic Needle Threader

The semi-automatic needle threader allows you to thread the needle quickly and easily – a great time saver!

Stitch Tie-Off

Secures your stitches at the beginning and end of your stitching to prevent thread tails from unraveling. It is programmable or can be used on demand.

Stitch Selection Buttons

Use the selection buttons on the front of the machine for quick access to utility stitches. For decorative stitches and letters, simply select the stitch by number and view the stitch on the LCD screen.

Top Drop-In Bobbin

Insert the bobbin, place the thread into the channel and start sewing. This jam-resistant bobbin and cover plate are transparent, making it easy to monitor your thread supply.

Start / Stop Function

Sew at a consistent speed without using the foot control, with the press of a button.

Mirror Side-to-Side

Many stitch patterns can be mirrored from side to side, providing more creative options.

Stitch Elongation

Many stitch patterns can be elongated from one to five times the original length while maintaining stitch density, offering a wide range of creative possibilities.

Drop Feed Teeth

Disengage the feed teeth for special techniques such as free-motion quilting, free-motion monogramming, button sewing, darning and thread painting.

Extra-High Sewing Speed

Sew at any speed, up to 1,000 stitches per minute! Saves time when sewing projects with long seams.

15 Needle Positions

Sew a straight stitch in 15 different needle positions for ideally placed topstitching, edge stitching, understitching, stitch-in-the-ditch and more.

One-Step Buttonholes

Sews both sides of the buttonhole in the same direction to help eliminate distortion and deliver evenly balanced stitches.

Nine One-Step Buttonhole Styles

Nine buttonhole styles are designed for various sewing applications.

Large Sewing Area

The generous space to the right of the needle measures 163 mm in width and 110 mm in height (6.4"x4.3") offering room for larger projects.

Adjustable Stitch Length and Width

When you choose a stitch, the optimum stitch length and width are automatically selected for you. You can adjust your stitch length and width to customize stitches for your fabric, thread and sewing technique. The maximum stitch width is 7 mm and the maximum stitch length is 4.5 mm.

Free Arm

Simply slide off your machine's removable accessory tray to access the free arm. This helps you easily sew smaller, hard-to-reach areas such as trouser hems and sleeve cuffs.

Adjustable Presser Foot Pressure

Adjust the downward pressure of the presser foot for smooth fabric feed on a wide range of fabrics and fabric thicknesses.

Push Button Reverse

Reinforce the beginning and end of seams and stitch programs.

Adjustable Thread Tension

Easily adjustable for your selected stitch, thread and fabric.

LED Lighting

The LED lighting provides a clear view of the sewing area.

Optional Extension Table

The optional extension table provides a wide, level addition to the sewing surface, making it easier to work on larger projects. The table's feet are independently adjustable to help ensure perfect alignment.

Accessories Included

Utility Foot A, Decorative Foot B, One-Step Buttonhole Foot C, Blind Hem Foot D, Zipper Foot E, Non-Stick Glide Foot H, Overcasting Foot J, 1/4" Piecing Foot P, Bobbins (Class 15 Transparent), Spool Pin Felt, L-Screwdriver for Needle Plate, Large Spool Cap, Small Spool Cap, Seam Ripper/Lint Brush, Auxiliary Spool Pins, Needles and Soft Cover.
